

WELCOME To MLOPS

Session - 1

Git and Github

June 04, 2025

Github telling me my project has a security vulnerability

My project which hasn't been touched in three years

AIC

AGENDA

- ① Git
- ② Github
- ③ Terminologies (Project) - Push, Pull, Commit
- ④ Branching
- ⑤ Conflict Resolution
- ⑥ Contribute to open source projects

Module Agenda

1. Git-HUB
2. Build an ML application - deploy it online, Streamlit.
3. Deploy ML Endpoint - API, Flask
4. Docker - containers, containerization.
5. CI/CD - 2 Sessions.
6. Experiment Tracking - MLFLOW
7. System Design - 1/2 - 2 Sessions.
8. SageMaker - How to use/deploy on Sagemaker.
9. Introduction to Apache Spark - Distributed Computing.

Please Practice.

MLOps

Machine learning pipeline.

MLOps vs DevOps debate

Is MLOps actually like DevOps?

GIT → Open source
Version control system

model.ipynb

model-copy.ipynb

empty

Save this state

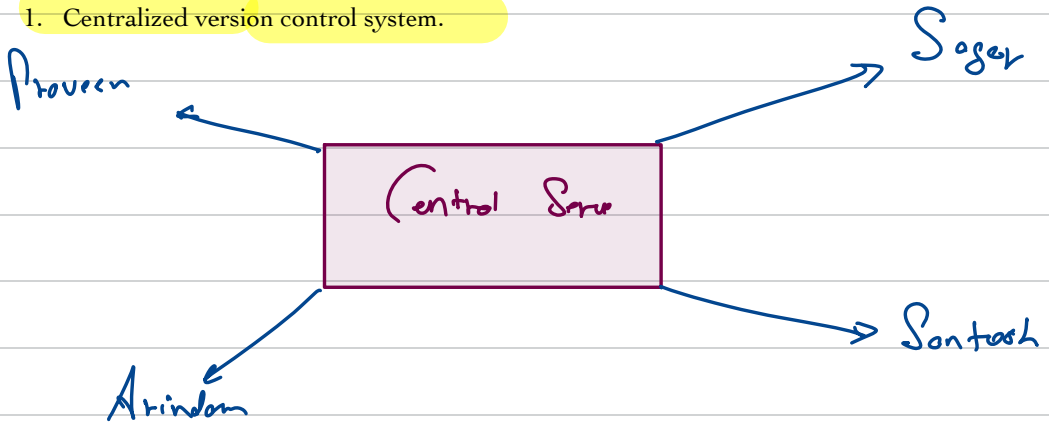

Code is working
but v. basic

Feature

Different kinds of version control system.

1. Centralized version control system.

2. Distributed version control system.

Pros of Centralized VCS:

1. High Security
2. Ease of Use; no confusion, as for what's the most recent code/version.
3. No Conflicts.
4. Real Time update and monitoring

Cons:

1. Central point of failure.
2. Scalability Issues.
3. Limited offline capabilities.

GIT HUB

GIT →

- GitHub (Microsoft)
- GitLab (GitLab)
- Bitbucket (Atlassian)
- Code-Commit (Amazon)

Email → Gmail
Yahoo
Zohool
Proton

What is Git?

19 users have participated

A	A nickname for GitHub.	0%
B	A programming language.	0%
C	A remote repository platform.	11%
D	A version control system.	89%

Which of the following is true about Centralized version control system??

0 users have participated

A	It does not rely on the central server	0%
B	It is victim to single point of failure	0%
C	It rely on the central server	0%
<input checked="" type="checkbox"/> D	Both B & C	0%

10  Sonali Ghosh	1/1 ⚡ 94.07	

Leaderboard

Based on all quizzes from this session

 2	 1	 3
 2/2 ⚡ 187.30	 2/2 ⚡ 190.36	 2/2 ⚡ 187.20
4  Arindam Maji	2/2 ⚡ 185.83	
5  Praveen MC	2/2 ⚡ 185.62	
6  Sagar Deka	2/2 ⚡ 184.73	
7  Venkata Sai Pramod Kumar	2/2 ⚡ 184.33	
8  Chirantan Sharma	2/2 ⚡ 184.23	
9  Sonali Ghosh	2/2 ⚡ 183.20	
10  Rajeev Ranjan Kumar Singh	2/2 ⚡ 178.83	

Github Terminologies

1. Repository: Fancy word for folder that contains code
2. Local Repository: Folder on my local computer (may or may not be present on the cloud)
3. Remote Repository: Our folder of code, uploaded/stored on the cloud.

Commands:

1. Commit: Saving the current state of the repository
2. Pull: Updating our local repository with any possible new changes.
3. Clone: Creating a copy of the repository on my local computer, and connecting it with the repo.
4. Push: Updating the remote repo with new changes made in local repo.

BRANCHES :

Main / Master - branch (most stable code)

↳ V1-branch
↳ Copy of my main branch

Quiz time!

Time Left: 56s

In Git, a branch is:

0 users have participated

- A A secret part of Git config. 0%
- B A separate version of the main repository. 0%
- C A remote repository on someone else's account. 0%
- D A new repository with no code in it. 0%
